COLLEGE TO GROW

JUST SIX MONTHS AGO Mrs. Ferry and I came to Pine Manor. The intervening weeks have been exciting ones for us; we should like to tell you of some of the things that have most impressed us during our brief stay.

First of all, we have found that faculty and trustees are united in their belief in Pine Manor's future and in the feeling that our primary aim should be to offer two fine years of liberal arts courses. The three-year courses that we have been offering are, therefore, coming to an end this year when the four students currently enrolled complete their work. Hereafter, girls who have developed an interest in nursery school training through our continuing arrangements for practice teaching at Tenacre will be encouraged to transfer after graduation to some of the fine senior institutions that offer such programs.

Two Years Only, From Now on

Our own faculty will concentrate on providing a two-year program in the humanities and sciences second to none. A committee of the faculty has already spent many weeks in a review of the curriculum and we hope to see some interesting developments go into effect next fall.

To Grow on New Campus

This past September Dana Hall students moved into their large new Classroom Building, located just across the hockey field from Grey Lodge, along Dana Road. This has meant that the campus you are familiar with has been in a sense divided. Westlea, the new Alumnae Library, and our other buildings around the pond and beyond it identify what is to be our campus of the future. There is plenty of room there for our major buildings, and it is a perfectly beautiful area, to my mind second to none in New England as a site for a junior college.

Our main problem, of course, is to center our activities there as soon as is practical. One of our early moves, probably, will be to shift our admissions and other offices up to that region. As soon as housing permits we shall hope to give up the buildings farthest from our new campus, but that must wait upon the construction of new buildings in large part.

To Stay Small

The enrollment this year is 234 students. Trustees and faculty are agreed that Pine Manor should remain small. That means a maximum ceiling of between three hundred and three hundred and fifty in the years ahead, small enough so that individual attention can be given each student.

Our current dormitories and dining halls will not take care of that number, of course. New construction and acquisition will be essential. In classroom space we are better situated at the moment, for the science wing of Westlea and its large lecture rooms, the new quarters in the Alumnae Library for general and art study, classrooms for French in Le Manoir, and facilities in Hopekirk give us a little leeway.

Stressing French

Lathrop was fully reactivated as a center of French activity this year. In addition Le Manoir was made a French house. Two rooms were converted for classrooms, and a third room for discussion purposes. Some tape recorders were provided, and French continues as a major interest here at Pine Manor. In my mind it is one of the best things we have.

One of our major problems here is the high cost of operating small residence units. Some of our current houses take care of fewer than ten girls. That used to be satisfactory back in the days when maids were plentiful

New Trustees Elected

TWO NEW MEMBERS of the Board of Trustees are William Randall Crawford, Jr., of New Canaan, Connecticut, and Edward H. Roemer of Brookline, Massachusetts.

Mr. Crawford, an attorney, is senior partner of Crawford & Reed, New York City. He is a director of North American Aviation, Inc., American Bosch Corp., Arma Corp., Great American Industries, Inc., Rex Products Corp., and Connecticut Telephone and Electric Corp.

His wife is Elizabeth Brouard Crawford (Dana Hall, '27). They have four children, two of whom are graduates of Dana Hall.

Mr. Roemer is the buildings' engineer of New England Telephone and Telegraph Company in charge of all building construction throughout New England.

His daughter, Mary Roemer Brickley, is a Dana Hall alumna of the Class of 1942.

and their salaries were not high. It is less successful in our current economy. The only long-term cure will be the construction of more modern facilities when we can get to it. We have taken certain intermediate steps, however, which I think may be of interest to you.

Women at Work

First of all, every student now takes her turn in waiting on table. Maid service in rooms has been reduced, and we expect this general trend to continue. While there is nothing very startling about these changes, for such colleges as Smith have been operating in this fashion for many years, they are new at Pine Manor. There is much to be said for the charm of the old way, and changes such as this are not being made entirely from choice. However, it is probably a good thing for young women to become familiar with household duties, since most will depend upon the services of household machines and their own skills after graduation rather than on the servants that young women could expect in the life of earlier generations.

This fall many students asked us for part-time employment. Some wanted to work because they needed the money, while others wanted the experience. An employment bureau has been set up under Dean Romig, and

some thirty students are now carrying assignments in baby-sitting, dishwashing, cleaning, office work, and the like. The enthusiastic contributions of student workers help the college immensely.

Through Student Eyes

One thing that will interest you is a recent move on the part of students to nominate certain campus leaders to assist the Admissions Office in the role of campus guides, presenting the college to visitors. There is no substitute for the enthusiasm of loyal students. They know the campus intimately, and can answer questions better than anyone else. The fact that this was a voluntary gesture on their part was very gratifying.

Student Center Needed

One of the major projects that has had to be pigeonholed temporarily due to the "tight money market" was the construction of a student center. The trustees had proposed to build it this last fall, to replace the Stack that is now out dated. It was to stand between the indoor riding ring and Green Gables. Plans have been drawn, and the building will be constructed when finances permit, but none of us are happy about having had to delay the project as a student center is much needed.

It has been a great privilege, during the past six months, to meet often with the officers of the Alumnae Association. They are dedicated and hard-working people. Any college president needs the help of alumnae and that is particularly true in the case of a newcomer. Your officers have provided it without hesitation. You have every right to feel that the people you elected are doing their job well.

Alumnae Are Our Right Hand

It is also gratifying to have the office operating well under the leadership of Anne Leavitt, '42. As an alumna herself she knows many of you and knows your interests. You have already seen some of the results of her work in the BULLETIN. I know you will see more when you come to talk with her at the office, as I hope you will all do soon.

May I close with this one wish: please come back to the campus as often as you can. I should like to talk with you and to have your points of view. By working together I believe we can do more than can be done without your help. It will always be a pleasure to see you.

Sincerely yours,

FREDERICK C. FERRY, JR.

WHY COLLEGE?

BY MADELEINE FIELD CRAWFORD

A few weeks after the opening of college is a very appropriate time to challenge students with the query "Why College?" Dean Crawford, late in November, spoke in chapel on this theme. Her remarks are presented here.

Dean Crawford joined the Pine Manor faculty in 1947. A graduate of Oberlin, she received her doctorate from Radcliffe and spent a year of study in Copenhagen under an AAUW scholarship.

WHY DID YOU COME? Surveys show that there all too many college freshmen who do not understand the main purpose of a liberal education. The reasons given for coming to college range all the way from the opportunity to meet the right people — to having a home base from which to operate over the weekend — to gaining a diploma or degree — to learning to think.

Understanding the aims of the liberal arts program in college is probably the hardest and the most important job for the freshman today. Certainly failure to understand the main purpose and an overemphasis of the social life of the college are two of the primary causes of failure of the college freshman. In the words of the late President Nielsen of Smith College, spoken some forty years ago, too many college students define college as "a slice of boredom between two weekends."

College Is Not an Extension of High School

First of all, let me tell you what college is not: Dean Robert Cox of Duke University says that "college is not grade 13 in high school"; and Father Dwyer of Villanova says that "college is not an advanced school for children. . . ."

What then *is* college and what are its purposes?

"Quick apprehension, quick comprehension, and quick action are what modern life puts a premium upon — a readiness to turn this way and that and to not lose force or momentum," said Woodrow Wilson. To produce individuals who can meet this challenge is the primary purpose of a liberal education.

In college you should learn to think. You should meet complex intellectual problems and learn to handle these on your own. You should get a disciplined training of all of your faculties. President Pusey of Harvard University, in his recent special report on Harvard College, says that the chief purpose of any liberal arts college should be to develop "increased insight, wider knowledge, firmer direction, and all the other qualities of mind and will."

To Learn to Think

The programs set up in the various liberal arts colleges usually vary only in minor details. All of them enable the student to become acquainted, by sample, with the fields of modern knowledge; they subject the individuals to several kinds of mental discipline. This they do by maintaining a balance between the humanities — literature, language, and the fine arts; the social sciences — history, political science, economics, and sociology; and the natural sciences — chemistry, physics, and biology.

The inability of the student to understand the primary aim of the college all too often produces individuals who are not disciplined mentally. It is this failure of the students, more than anything else, which has given the protagonists of a liberal education cause for alarm. It is this, to my mind, which explains, in part, the opinion and attitude of the President's Committee on Higher Education.

Last spring President Eisenhower appointed a committee of some thirty-three educators and leaders of business to study the problem of education beyond the high school level as it affects our national life. In view of

the increasing numbers of young people who will be seeking education at this level in the near future, this is a very important problem. . . .

Should We Cultivate an Intellectual Elite?

Last week the first report of the President's Committee was published and this was the first paragraph of the report: "Our ideals and the increasing complexity of our civilization require that each individual develop his or her talents to the fullest. This country will never tolerate the nurturing of an intellectual elite."

I think that most of us would agree with the first sentence. Certainly there should be opportunities for each and every one to develop to the full his or her special capabilities. Our democratic way of life is based on just that — equal opportunity.

The second sentence, "This country will never tolerate the nurturing of an intellectual elite," comes as a great surprise to the protagonists of a liberal education. This would seem to indicate the quality of the education which the President's Committee feels should be offered to our young people to best fit them for our peculiar national life. A liberal education — beyond the high school level — as opposed to specialized education, is certainly not the thing for everyone. People differ tremendously and you can't just thrust higher education at individuals. There are many who have had very little formal education yet certainly belong to the intellectual elite and there are just as many individuals who have had years of formal education who *still* do not belong to that group.

In the Boston *Sunday Herald* of November 25, I was very pleased to

see that this part of the President's Committee report was vigorously attacked in an editorial. The writer of the editorial says: "The truth of the matter is that an intellectual elite formed the concept of democracy, kept it alive, and is, moreover, responsible for nearly every progression we have made in science, art, and human relations. The country not only tolerated but applauded the constructive measures it created."

"Make Scholarship an Exciting Career"

In an article entitled "Better Men and Better Mousetraps" in the November 10 issue of the *Saturday Review of Literature*, President A. Whitney Griswold of Yale University deplored the neglect of pure learning. He called upon the colleges to make scholarship an exciting personal career. He urged the colleges to fulfill their functions — to create an intellectual elite.

President Griswold does not think of the scholar, the intellectual, as a being apart from ordinary man. Many are the epithets that have been hurled at the intellectual, but President Griswold says, "He is 'Man Thinking.' He is the citizen performing the function appointed for all citizens in a civilized state, a function without which there would be no civilized state. He is Everyman apprehending the meaning of things."

Our national tradition is rooted in the idea that our people shall receive instruction in both learning of intrinsic and learning of extrinsic value and make the most of both, each according to his ability. By intrinsic learning, President Griswold means pure learning and by extrinsic learning he means useful knowledge or knowledge which can be applied.

"The national tradition, however," he goes on to say, "was founded by men steeped in learning of intrinsic value. Out of this kind of learning came the most hopeful system of education any nation has yet conceived. The hopes of that system are lagging — they need to be refreshed at their source. We have neglected pure learning; we have even slighted the invention of better mousetraps to bestow our honors upon their mass production. We need them all — the pure learning, the practical inventiveness, and the mechanical skill in proportion to their values if we are to save our civilization and ourselves."

This year, here at Pine Manor, we are reviewing and renewing our purpose as a liberal arts college and we are revitalizing our curriculum in ac-

Boston Club

Has Dinner

BOSTON ALUMNAE held a Casserole Supper recently at Julie Crandell's apartment in Boston.

Mr. and Mrs. Ferry were special guests at the social hour which preceded the supper.

The casserole was Tunafish Carolina from the Houston Club's famous cookbook. It was prepared in the Pine Manor kitchens under Mr. McGilvray's direction. We hasten to add that this seemed the most convenient arrangement — not because Boston alumnae cannot cook, but because the group came directly to Julie's from busy jobs.

Some of those who attended are pictured here. Others were Elizabeth Shepherd, '39, Judy Doane, '53, Eleanor Soble, '56, Mary Ann Gifford, '53, Anne Bullivant Harper, '41, Laurie Rice Kelly, '39, Julie Crandell, '51, and Anne Leavitt, '42.

Eleanor Rowan, '45, Scotty Lee, '53, Debbie Mellor, '48, and Liz Vanderbilt, '53, enjoying themselves at the Boston Casserole Supper.

Vesper Speakers

DR. EDGAR F. ROMIG, minister of West End Collegiate Church in New York City, spoke at Vespers on November 18. Dr. Romig is the father of Dean Eleanor C. Romig.

Bishop Donald B. Aldrich, who was formerly rector at the Church of the Ascension in New York City and the former dean of the Chapel at Princeton University, was another recent Sunday evening speaker.

Dr. John Mellin, pastor of the First Presbyterian Church in New York City, spoke to Pine Manor students at a Vesper service early in November.

cordance with that aim. Any changes that are made will probably not be drastic, because we are by tradition primarily a liberal arts college and we are revitalizing our curriculum in accordance with that aim. Whatever changes are necessary will certainly be purposive.

You should be here for one reason and that is to take full advantage of the liberal education now offered you — to become the "man thinking" of President Griswold — "to gain increased insight, wider knowledge, firmer direction, and all the other qualities of mind and will," of President Pusey, and to become a member of the "intellectual elite" in its truest sense.

Bardwell Entertainments

Popular as Ever

THE CANADIAN PLAYERS presented Ibsen's *Peer Gynt* in October as the first of the Bardwell Entertainment Series. Pine Manor students found this a fascinating modern version of the famous play. Bruno Gerussi, a vibrant and compelling actor, played the leading role, with Frances Hyland as Solveig. George McCowan appeared as the "Troll King." Douglas Campbell directed.

As the second of the series beautiful Irmgard Seefried entertained students with a delightful selection of songs. Miss Seefried is ranked as the best Lieder singer since Lotte Lehmann and one of the finest interpreters of Mozart operas. She has appeared at Salzburg every year since 1946 and last December was a soloist with the Boston Symphony in New York's Carnegie Hall. Her husband is Wolfgang Schneiderhan, winner of both the Mozart and Schubert medals.

Early in February Nathan Milstein, violinist, appeared in Bardwell Auditorium with his famous Stradivarius.

Plan to Attend

On March 7 Pine Manor students and friends will hear the dramatic entertainer Angna Enters, the American Hermione Gingold.

Eugene Istomin, an internationally known young pianist who has recorded on Columbia Masterworks, will appear at Pine Manor on April 11 as the final program of the series.

HUMANITIES – Cultural History of the Western World

The Humanities course was offered first in 1942 as an elective. Since 1947 it has been required of all seniors. Elena Mather, '57, of Saraquay, Quebec, presents for BULLETIN readers a student's view of this course.

I KNOW an old saying that goes something like this: "There is no use locking the barn door after the horse has run away."

Oddly enough, this saying brings to my mind Humanities, the course that surveys the development of Western culture and its influence on our civilization.

Humanities carries with it unjust fears in the minds of seniors who in the freshman year have had the usual "hourly exam shakes" and have seen "so-and-so who never has to study, now deep in her books."

Before discussing further the barn door, perhaps the course itself needs explanation.

What is Humanities? In the period stretching from September to June, we, the seniors, are given an insight into the growth of culture from the time of the Greeks and Romans to nowadays. We trace the development of music and art through the ages. We get a little philosophy, as in the time of Plato and Aristotle, and a deeper survey of literature, both Continental and English.

All This Since September

Mrs. Sleeper, in just the short time we have had since September, has already given us not only the beginnings of music, but basic fundamentals so necessary in recognizing a good musical composition — what it is worth and the ideas it is portraying. Similarly, in art and architecture, Mr. Henry has given us the earliest sculp-

turing and structures in Greece, and, with the aid of magnificent slides, their effects on Roman, Early Christian, Romanesque, and Gothic buildings. Those of us who may be fortunate enough to go to Europe should be able to show a little intelligence in Paris' Notre Dame!

Mrs. Williams, through lectures and reading selections, has made us aware of literary masterpieces we have always been told to read and never gotten around to. What is more, with a little concentration, we find that

some of them make sense and that they are not all written in the proverbial Greek!

Last, but by no means least, Mr. Thompson has impressed upon us the fact that people before the twentieth century were capable of thought, and that their ideas and philosophies have made us what we are today.

Lock the Door Now

I mentioned the locking of the barn door only to try and impress upon the Humanities students the importance of getting all that is possible out of the course while they have the opportunity. The horse is often right out of its stall before we realize that we are letting it get away!

We are really privileged to be given an opportunity such as this.

Let's Keep It Growing in 1957!

A Message from the Alumnae Board and the Fund Council

WE HOPE YOU CAN COME BACK to Reunion to see the library, as no picture can possibly convey the charm of this beautiful Georgian building nestling on the slope next to Westlea. Even now in the snow, those of us here get a warm glow whenever we look up at it from Grove Street. The Pine Manor Alumnae Library is now almost ready for use. It is a most appropriate library for a girls' college.

The most wonderful thing about the new library is the way in which the alumnae have supported the 1956 Alumnae Fund, which has been turned over in total to the library fund. Last year 1,144 alumnae contributed \$37,254 — tangible evidence of their loyalty and continuing interest in the welfare of Pine Manor. The chart above shows the giving by classes and the percentage of participation.

We thank all of you.

We should like to convey our special appreciation to Jane Campbell Smith,

'44, who as fund chairman did a superb job.

Thanks to Fund Workers

All of us are deeply grateful to each class agent for a fine performance — without you this venture would not be successful.

Pine Manor still needs \$234,000 to complete the financing of the library. Parents and friends will help. Last year they gave \$28,657. This, too, is a wonderful tribute to Pine Manor and to liberal education for women.

This year the Alumnae Board has voted to turn over the 1957 Alumnae Fund to the library.

A gift, large or small, from every alumna is a very real way for each of us to help meet the great needs of the Pine Manor of today, and make it a school of which we will all be proud and, we hope, one in which we will surely enroll "our children and our children's children."

Co-chairmen of the 1957 Alumnae Fund — Julie Crandell, '51, and Dorothy Bell Jones, '40. Dottie is Mrs. Robert W. Jones of Wellesley Hills. Before her marriage she was on Pine Manor's staff as secretary to Mrs. Potter. Julie attended the University of Arizona after Pine Manor and then worked in the admissions office at M.I.T. She returned in January to her home in La Jolla, Calif.

HUMANITIES

(Continued from Page 7)

Humanities is not forgotten at the June ceremony of the Bonfire of Books, but while it does require work, and there can be no debating that, the knowledge we can obtain is of a kind we will value all our lives. Because of it, any trip we take, concert we hear, or book we read will take on considerably more meaning, and no one can go through life in a normal way without doing one or all of these things.

For the students who will take Humanities in the future, may I say only that you do not draw your dying gasp when you step into Bardwell for a test, nor will you be shot at sunrise should your first mark be below an A. It is work, but it is worth-while work; and what is more, you feel, at the end, that you have really learned something. The idea in this course is not to let the horse get away and realize then that you've missed something valuable, but to lock the barn door in the beginning and open another door to a lasting enlightenment.

COLBY COLLEGE

WATERVILLE, MAINE

OFFICE OF THE
DEAN OF WOMEN

January 15, 1957

Dear Alumnae:

This is a momentous year at Pine Manor and I wish all of you were near enough to visit the College and witness first hand the developments here.

Many of you have already met and share our enthusiasm for President Ferry. More of you will be seeing him when he makes a Western trip in the spring.

We are all delighted this year that one of our own alumnae, Anne Leavitt, has come back to Pine Manor as Secretary of the Alumnae Association.

And, lest we forget, the new Pine Manor Alumnae Library will open its doors soon. The building is beautiful as well as functional, and is a portent of things to come on the Pine Manor campus of tomorrow. But tomorrow's campus can develop only in proportion to the sustained support of the Alumnae. The new library has been built but not paid for; its construction represents on the part of the Trustees a vote of confidence in your interest in and devotion to Pine Manor's future. So -- won't you continue to share generously with your alma mater by regular contributions to the Pine Manor Development Fund? Pine Manor needs you; I know we can count on you!

Loyally yours,

Pauline Tompkins

On a recent visit to Pine Manor, Dotty Bell Jones, '40, and daughter, Susan, and Anne Bullivant Harper, '41, and her children, Patty, Ricky, and Stuart, admire the Pine Manor Alumnae Library.

PINE MANOR BULLETIN

Helping with the multitudinous chores in the Alumnae Office are students Arline Hotte, daughter of Arline Towne Hotte, '30, and Betsy Downs, sister of Judith Downs Bockes, '53, and Elliott Downs Crummer, '50.

IN MEMORIAM

Mrs. Anne Liese

MANY ALUMNAE will regret to hear of the death of Mrs. Anne Liese, on October 20, at her home in Denver, Colorado.

"Annie," as she was affectionately called by members of more than a dozen classes, was in charge of the Stack from the day of its opening as Pine Manor's first smoking room and student center until her retirement in June 1953. Her gentle presence there, her sunny willingness to shorten a skirt (or lengthen it!), to make a favorite sandwich (or a stack of them!), to be an expert fourth at an incomplete bridge table, to listen to problems and give wise advice — all these made the Stack a happier, more homelike place for scores of students.

How deep was her interest in "her girls," how sincere her affection for them and her desire to be helpful to them, probably only a few realized, but the trust and respect universally given her bespoke her valued place in the life of Pine Manor.

MARIE WARREN POTTER

We all stayed in a cabin at Oglebay Park and we had a wonderful week together — first time since our graduation. We also saw Ruth and Howard in New York in November. We are planning to be back in 1960 for our 20th." (Don't wait for a "special" occasion. You can come any time — and often. Ed.)

The thing that is fun is sharing in a small way our lives now with the people with whom we shared two years of our past. Do send in your news notes no matter how trivial they may seem to you, for we all enjoy hearing from the members of our class. Good luck and Happy New Year!

1948

I, Ginger *Bown Coddington*, had a great time writing this class letter for all you busy career girls and housewives, so drop everything and read on. . . . You'd be surprised at all the news I have uncovered since the last BULLETIN!

What a wonderful Christmas in Maine! Santa Claus came through this part of the

country with his reindeer wearing snowshoes — but really outdid himself at our house and I hope he had something left for the rest of you! The mailman delivered eight Christmas cards from the Class of 1948. I admit it isn't earth-shattering — but encouraging. Don't keep your news a secret. We'd all like to know about your new offspring, new house, new husband, or new job — and if you have moved, and what you do in your community. We're normal, curious, human beings who like to know what's going on — so don't hold back.

Way back in August, after I had sent my last news to the Alumnae Office, Ann *Kinsella Rees* wrote me some sad and some happy news. I know you will all be shocked to hear that Ann's mother was killed in an automobile accident in June of 1954. I'm sure I speak for the entire class in extending sympathy to Ann at this late date. Ann stopped working as an advertising copywriter and stayed at home keeping house for her father, together with Junior League work. Her father remarried and Ann now has a "lovely college-age sister and a wonderful little brother. I married in March 1956, a young Englishman (design engineer at Lockheed Aircraft Corp.) who's only been in America a year. We're happy as larks and as of sometime in December, our new house will be at 83 Long Island Place N.W., Atlanta, Ga." Belated congratulations, Ann. No doubt you enjoyed your first Christmas in your new home.

Late news arrived from Marge *McGee Cates* this past fall. "We moved into our new house last September and are expecting a third child the eighth of December." I would like info on this for the next BULLETIN. They have two daughters, DuPré and Lisa. "See Jeanie *Craighill* (Mrs. Gordon C.), Class of 1950, each May at Sea Island and get to New York annually and see Nina and Sonny *Wainwright*."

Now to the Christmas cards. I have never seen such adorable children as our class has and only wish I could print the pictures I have collected for the BULLETIN in some issue. Carol Lou *Stowell Burnett* has four of the best looking children—three boys and a girl—and she writes, "Bill is 6 this month and Johnny was born Mar. 27. [Her other two children are Christie and Curt.] We moved in town to be closer to the hospitals. We miss our view of Mt. Rainier but have a golf course for our backyard — the sandtraps haven't become sandboxes as yet!"

Carolyn *Burford Brady* wrote me about the birth of their first child, a son, last July, and of course they are in seventh heaven. "We also moved into our new house two weeks before the baby was born. Did you know we have a Pine Manor Alumnae Group in Houston? We compiled *Casse-rolle Cookbooks* and sold them for a dollar — made a million." Good idea for other groups — take note.

No news from Ginny *Chittenden Pierpont* but the picture of her little daughter, Lucy, that was enclosed with the Christmas card needed no further explanation — she is a sweetheart. Thank you, Ginny — a prize to add to my collection.

Ginny *Wilson Dodge* is off again to Florida — staying at the Princess Islena at Daytona Beach with Schuyler and two sons, Frankie and Billy. How could anyone leave this beautiful winter weather in New England? I'd catch the next plane.

Phyllis *Chait Rogal* again this year sent as her card a picture of her children. It is really my favorite Christmas card. And she and Bruce have two darling children. Kim is a very handsome boy and Anne is just as quaint as she can be. I am really wary of opening Phyl's letters of late — as the note on her card indicated I should be! "I have managed to crack the cartilage in my right knee and am in a magnificent cast — thigh to foot. I've gotten through two ghastly weeks but seriously doubt that I'll survive the next two. We hope it will heal, if not, an operation to remove the cartilage is the only alternative. However, if all goes well, Bruce and I plan to fly to Haiti on Jan. 25 for our first vacation away from the children since Anne's birth. Anne is walking better and better. Her hips are completely fine and only exercise for the knees and visits to the doctor at three-month intervals now." Well, I am so very happy about Anne, Phyl, and know the class feels the same way — but am anxiously awaiting word on the outcome of your trouble. Let me know so I can pass the information on to the class in the next issue — and I think you'd better stay put and not attempt a trip to Haiti.

Franny *Durant Larsen* sent me a picture Christmas card and, really, Claudia is a beauty. Mitchell will really have quite a collection of prospective dates. What a lucky boy.

Saskia *Stahl Kessler* wrote me before leaving for Holland in December. She and Hein were in Holland all summer and had a marvelous time but evidently the weather was awful. "We were very busy visiting friends and relations. The children are both fine. Wendy is quite a girl now. She gets into everything and has a terrible temper which we will have to get rid of soon. I still don't know whether I like it or not but we are leaving St. Catharines. Hein got a job with K.L.M. (Royal Dutch Airlines). We are going back to Holland for a year where he will get training and

then we hope to come back to this continent, either Montreal or New York. But we don't know whether they will send us to another country in Europe or somewhere else first. Hein will be trained as manager of an office. It's a very interesting job and we both love it, but it is very hard to give up everything here. We got so attached to house and friends. We are trying to sell the house. Dee of course will have to go to a Dutch school now. Hope that will work out. He probably won't have too much trouble. He is in second grade now and his Dutch is not too bad.

"We are trying to rent a house in Holland but there is a housing shortage now. In the meantime my address will be c/o Mr. and Mrs. C. Stahl, 14 Populierenlaan, Huis ter Heide (Prov. UTR), Holland.

"My parents built a beautiful house three years ago. This summer was the first time we saw it. They have a lovely swimming pool but I swam only once and certainly not because it was hot. Hein and I took a trip to Italy through Germany and Austria. We saw a lot and had beautiful weather all the time. Vienna is wonderful. Lovely city, nice people, and marvelous places to eat and dance. Venice is very nice. You have to see it but not to go there again. We went by car. Were quite fed up with sightseeing after Venice so decided to spend the last five days at Garda Lake. Relaxed in the sun, swam, and played golf. My mother kept the children and it was nice to get away from them for two weeks but still longed for them." I quoted so much of Saskia's letter because I thought you would all be interested in their latest move and the interesting summer they had. It's really wonderful to read about friends who are leading such exciting lives—keeps me going some days when shopping and housekeeping get me down!

That's it. Hope you enjoyed reading the news as much as I did receiving it—and write, write, write—please. My address (Ginger) is Prout's Neck Road, R.F.D. 1, Scarboro, Maine.

Dear Mrs. Chace:

I do not quite understand how to express my thanks for your hearty CARE packages, which mean so much to us, and last one of which I received 19th of December. Hei-Ran, my daughter, said it is the really special occasion delivery by your Service League to send us those packages for these past two years. Every time when we receive one of those packages, all of our family get excited for gladness and chatter about Hei-Ran and you all there. But I am so sorry that each time when I want to write you I feel a little awkward because of my lack of English.

But it is a great pleasure I can tell you that my husband, who was captured during the invasion of communists by them, is still alive: a few days ago, one of my friends here, heard my husband's very voice through North-Korean Broad-Casting. His voice was a little weakened, she said, which is, of course, by oppression from them, I believe. The fact, however, that he is not dead yet gives me a great courage and children's joy were beyond expression when they heard it. I could not help tearing a bit and thank God for his safety.

I hope some day when our situation changes good enough and my husband become released, I pray, and he, who used to go to the United States, will have an opportunity to visit to the United States again and call on you for your endless kindness for both my daughter, Hei-Ran, and our family.

Yours sincerely,
Mrs. Whang Hyun Soon
